## The Intermec CK3. Its value becomes apparent sooner. And later.

### Save Time and Money.

In partnership with Intermec and CAPACD, Print and Data Solutions provides solutions that can help your organization keep track of inventory and the audit process in a fraction of the time - saving you both time and money.

Whether you have a manufacturing or mobile workforce project, with over 10 years experience, Print and Data has the ability to target the right solutions for your specific needs. You will notice the difference in our products and services when you use our state-of-the-art bar code solutions to track inventory in your company.

### Do More. Carry Less.

The Intermec CK3 combines the features of multiple devices into a single, powerful mobile computer. High performance, omni-directional near far scanning from 6 inches to 50 feet, built-in image capture, voice/speech capability for hands-free picking, RFID and wireless printing compatibility enables you to do more. Faster.

CAPACD's solutions have covered custom development ranging from wireless warehouse inventory applications to radio-based automotive service workflows and almost everything in between. CAPACD's goal is to bring targeted solution enabling the highest return on investment while utilizing the latest technologies.

### Services at a Fraction of the Cost.

Contact Print and Data Solutions for a complimentary needs analysis and experience award winning service and support at a fraction of the cost.
